Web Applications [2023/2024]

Lab PE: Practice for exam submission

Experiment with the platform in preparation of the exam: push what you produced so far (or another project) on your GitHub Classroom's private repository.

1. Commit your work to GitHub Classroom (to become familiar with the system)

As reported in the exam rules, you will use GitHub Classroom to submit your web application for the evaluation. To avoid last-minute issues, this exercise is to verify that you are successfully able to use the GitHub Classroom platform. <u>You can also submit partial solutions (or even mostly empty code) as this is just for practice</u>. You can submit what you developed so far at the com following link:

https://classroom.github.com/a/ZPxwSH2I

You can find instructions on how to use and submit on GitHub Classroom in the course website: https://github.com/polito-WA-2024/.github/blob/main/profile/EXAM.md

NOTE: the submitted application will NOT be looked at nor evaluated in any way. It is just a way for you to become familiar with the system. The submission will be kept private and not shared with anybody. Also, to avoid confusion with the submissions for actual exams, this possibility will be closed at the end of Sunday, Jun 23, 2024.

NOTE 2: This is not the link for the actual exam! Other links will be provided, i.e. a unique link for each exam.
